## About UMPSA

Established as a technical university in 2002, Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) offers a variety of engineering-and technology-based technical programmes, including high-level Technical and Vocational Education and Training (TVET).

Ranked as one of the best in Research and Innovation within the classifications of Malaysia Technical University Network (MTUN) and Non-Research University (Non RU), UMPSA is steadfastly committed to innovating and developing unique academic programmes through strategic international collaborations. A milestone of such innovation is UMPSA's world class dual-degree engineering programme offered in collaboration with Germany's Karlsruhe University of Applied Sciences (HsKA) – now seen as the benchmark for other public institutions of higher learning in Malaysia. In the field of research, UMPSA collaborates with local industries to focus on industry-related applications. Such research collaboration enriches the teaching and learning modules at the university, while simultaneously promotes commercialization of research output and products.

## Overview

It was then been fully accredited by the national body (MQA) Ruj. MQA/FA12109. It was established to support the policy of Malaysian government to offer more programs at Masters and PhD level to meet the needs of working people and national agenda to become a high-income economy status nation by 2028. The Malaysian government is serious in promoting lifelong learning and human capital development among its citizens. This is clearly stated in the Tenth Malaysia Plan, which has among its objective to develop a culture of continuous knowledge acquisition in line with rapid technological changes and increasing levels of knowledge in the economy.

The Master of Project Management (MPM) programme in Universiti Malaysia Pahang Al-Sultan Abdullah aims to add value to the project professionals by embedding global standardized approaches of Project Management, and core courses that provide market competitiveness and suitability to meet the Industry 4.0 needs within the domain of project management. The program also includes and encourages continuous career development through professional certifications in project management. It is suitable for working professionals having a basic degree in engineering, management, administration, business, information technology, and education. The programme operates on full time (minimum 1.5 years), and part time modes (minimum 2 Years). The program's curriculum structure consists of ten (9) core courses, one (1) research methodology, two (2) projects and two (2) electives to be chosen from six (6) electives offered by the faculty
